

CLARO

The Claro collection is the ultimate proof of pure European craftsmanship. The collection, made from natural stoneware, contains various items in organic, round shapes. The range stands out because of the shiny metallic gold and silver colours and the industrial look of the graphite items. The colours are obtained by a special process during the finishing phase. This results in a

unique product, allowing you to add a luxurious touch to your table. The combination of the organic shapes and metallic colours creates an outstanding product that offers a stunning contrast with white tableware. The collection is doing exceptionally well at various catering establishments and hotels, especially in businesses that want to create a unique atmosphere and experience.

CLASSICO

Just because monochrome typically consists of black and white contrasts, it doesn't mean you can't put your own spin on this trend. One of the new additions to CHIC's portfolio is the Classico range.

Classico consists of two different colours: white and royal blue. This colour scheme will add subtle personality to your table, without overpowering your dishes. When paired, these two tones create an absolutely stunning contrast with each other, resulting in a modern and crisp setting. It's a classic combination that will make any table fresher, cleaner and more inviting. As the name suggests,

Classico resembles a classic shape that never goes out of style. Its clean and perfectly balanced form is perfect for everyday use, as well as special occasions. The items are available in different sizes allowing you to serve your dishes on the most suitable surface.

All the white Classico items are made of the unique SiloxiHT material. The hardness of the material improves the durability of the products and its lightness helps reduce the carbon footprint of daily operations. The blue variations are the result of a combination of lightweight porcelain with a reactive glaze.

JADE

The perfect balance between design and choice of materials gives the Jade collection a distinct character. The robust but very clean shapes are made of highly durable porcelain, which ensures the strength and durability of the items. Classic forms are combined with a modern touch; appealing, radiant sage green colours are stylishly alternated with subtle

complementary soft white colour tones. The earthy notes create a rural atmosphere that perfectly frames your dishes for a well-thought out meal. Its colours are inspired by the precious gem Jade ("Jadeite"), therefore also the name "Jade". As such, Jade will bring a natural element to any modern or contemporary table.

LIVELLI

Bring some fresh, structured accents of outdoors into your dinner setting with Livelli. Livelli represents playful lines, textured surfaces and organic jagged edges. It's a discrete way to add a touch of colour, pattern and texture to your dinner. Since textured tableware is best in block colours, Livelli consists of 3 striking colour variations: black, white and beige. These base colours really let the raised designs shine to add

instant rustic charm to the table.

Another striking benefit of the Livelli collection is the fact that the items are mass coloured, which means there won't appear any visible discolouration in case of 'chipping'. The plates and bowls are finished with a matte or glossy glaze. Combine the different colours and shapes to set up an utterly stylish dining table.

PERLA

Perla (referencing the beautiful white round pearls from pearl oysters) is a symbol of innovation in several ways. It's the "top of the bill" collection from CHIC, where elemental natural beauty got combined with updated styling. The Perla (white) collection is made of the unique formulation SiloxiHT. This formulation consists of a blend of quality materials, which allows the product to be thinner, more durable, lighter in weight and more translucent than any porcelain product. SiloxiHT guarantees fine bone china looks with robust characteristics. Above this, the durable and lightweight

material is a good feature for the catering and restaurant staff, but also perfectly suited for the airline industry. Both the chef and the person who serves the plates like to work with it.

Perla boasts a magnificent gloss and organic round shapes, which are unique. *"The lightweight nature and durability really appeals to hospitality. The organic shapes look like they add a point of interest but keep quite clean lines, which is ideal. This range is very marketable and the price points make it great value for money"* (Birch, 2018).

Perla award nominated product

Thanks to its unique characteristics, the Perla collection got in its year of introduction nominated for the Horecava Innovation Awards 2018 (Amsterdam), the award for the best innovation in the Dutch foodservice industry. Next to this, the collection was exposed at the "Innovation & TrendLAB" at Horecava and the "What's new" exhibition's area at Maison&Objet in Paris. Last but not least, the collection ended up second in the Tableware International Awards of Excellence 2018 in the category "Hospitality", which was awarded at Ambiente (Frankfurt). Horecava being the largest hospitality fair in the Netherlands, Maison&Objet the international authority for home decor, interior design, architecture and lifestyle culture and Ambiente the world's most important consumer goods trade fair; therefore these nominations are an achievement on their own.

PERLA GOLD

With its continuous desire to innovate, CHIC aims to light a creative spark within all parties (both business and social) with its Perla range.

The Perla collection got a new, promising subrange, namely Perla Gold. The stunning gold colour ensures a high quality dining experience. The material used differs from the special SiloxiHT material which was used for producing the white Perla items. This because the surprising gold colour variations with metallic characteristics could only be combined with porcelain. As such,

Perla Gold is manufactured out of highly durable porcelain, to ensure the strength and durability for which the Perla collection is known. If you're looking to add an extra glam to your dining experience, this range can make your table setting look simple yet sophisticated. The subtle metallic detailing adds an eye-catching element to your tableware, and it creates a great canvas for your dishes to take full focus at any special gathering.

Pairing the white items with the golden ones ensures a promising table setting, maximizing the potential of each dish served.

VERSO

Set the scene with Verso, one of the most popular Chic ranges so far. Its elegant modern round shape is based on the idea that form should follow function, an embrace of minimalism. The raised edges guarantee anti-spill practices and make stackability of the different items possible.

As well as the Perla collection, the high-quality products of the "Verso" range are made of the unique formulation "SiloxiHT". This formulation consists of a blend of quality materials,

which allows the product to be up to five times stronger than regular porcelain, extremely thin, extremely light in weight and translucent. The raised edges of the Verso range complete the modern look of the different items.

Verso also includes a bamboo item that can be used either as a plate or as a lid for the matching bowls, as well as a few beige coloured items which give the chef the opportunity to add even more contrast to his or her table when combined with the minimalistic white items.
